- d) **Link Baiting** - create something that naturally attract backlinks – tool, article, interesting photo
- e) **Article Submissions** - SEO-friendly article creation and submission to PR services
- f) **Press Releases** – SEO-friendly press release creation and submission to PR services
- g) **Social Networks** – site submissions and links on social networks

Design Notes

1. **Representation** – a site may be the company's front door: you only have one chance to make a good first impression. A poorly designed site may reflect a poorly run and unprofessional company.
2. **Content is King** – the more informative site is, the more visitors will use the site / refer it to others.
3. **SEO** – visitors using search engines is the prime way a site will be found. Optimizing the design and content FROM THE BEGINNING so search engines like it is the best to encourage organic traffic.
