Have a Stinky Nasty Fly Infested Trash Bin?

Phew !!! Yech !!!

Hate to open the lid of your trash bin and catch a whiff of hot, rotting, smelly garbage, and then get attacked by a swarm of filthy, disgusting flies with attitudes?

PROBLEM SOLVED: NoFlyZone™ can easily and inexpensively solve this trash day dilemma for you. No longer will hubby and the kids fear taking out the garbage!

Keep those nasties at bay with NoFlyZone™. It uses Tea Tree oil in an extraordinary citrus-based spray made specifically for your trash bins and garbage cans to keep mosquitoes, fleas, flies and other bugs away without the use of earth-poisoning chemicals. And its earth-friendly formula repels the smell, too, neutralizing odors naturally with a simple press of its automatic trigger.

[Watch NoFlyZone™ Solve Problem](#)

ECO-FRIENDLY and SAFE: No harmful poisons or chemicals. It does the job fast using 100% natural citrus compounds. Rest easy – its safe for use around children and pets too. It's non-polluting and it saves water by reducing the need to wash the can. Can any other trash bin solution measure up to NoFlyZone™?

ECO-FRIENDLY and SAFE: Spend less time with the lid open. Its patented automatic trigger makes sure that you don't have to do anything but change the NoFlyZone™ refill cartridge whenever it runs out. Just hang a NoFlyZone™ deodorizing dispenser on the side of your trash bin and you're set for up to 300 sprays. When you close the lid, the trigger sprays the smell and bug repelling mist. It doesn't get any easier. View our 30-second video to see NoFlyZone™ in action.

Our customers say it best. . . .

"This product really tackled the stink and flies of our trash bin in the 115 degree summer Phoenix desert heat."

Jackie Prestonisk - Phoenix AZ - Sept 2008

"It's about time someone solved this dirty little problem. Even my goofy neighbor Bob comes over to 'spray and sniff' – he likes the sweet citrus smell"

Ken Whollen – Chula Vista CA – Aug 2008

Ready to REPEL THE SMELL?

At AMWGREENZONE, we're on a mission to prove that with a little creativity and Yankee ingenuity, being "green" doesn't have to be drudgery. To prove that, "Serious Greenage," as we call it, can actually be as automatic as the NoFlyZone™ spray trigger. We're Americans through and through, but we're also inspired by Aboriginal respect for the Earth. That's why we've launched a campaign to "nip at the heels" of a growing eco-awareness in the U.S. We're committed to collaborating with other companies, governments, and individuals to help synthesize a plan for guiding Americans more simply and more cohesively to greener lifestyles. AMWGREENZONE was created specifically for this purpose, and to be the corporate home of our first public contribution to Serious Greenage at the global level.

AMWGREENZONE Is On A Mission
